Charcoal supply chain

Kilns combustion efficiency < 20%

Large source of CO, NMVOCs, OC, CH₄

Production in rural areas

Unregulated and outdated diesel trucks.

Rural to urban transport

Large source of NO_x and BC

Includes burning of plastic to initiate combustion. Prevalent in slums. Source of HCl

Use in densely populated urban centres

Charcoal Production and Use Trends in Africa (2000 – 2014)

YEAR	CHARCOAL PRODUCTION [Tg]
2014	41.7
2030	82.7

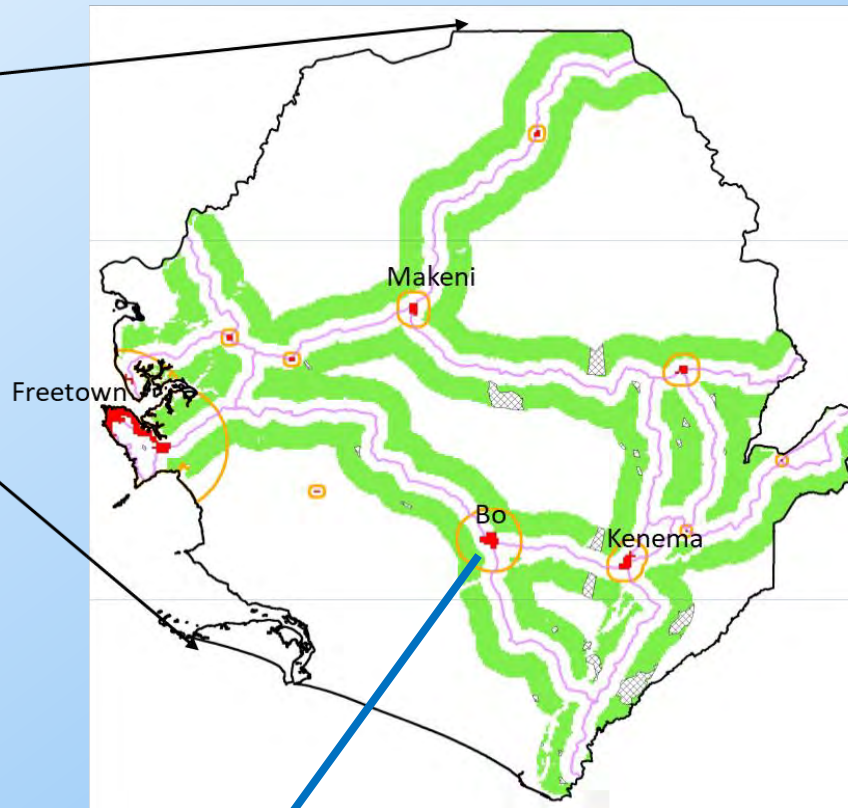

Data source: United Nations energy statistics database (UN, 2017)

Developing emission inventory

Emission = Activity Data x Emission Factor

Mapping emission activity locations

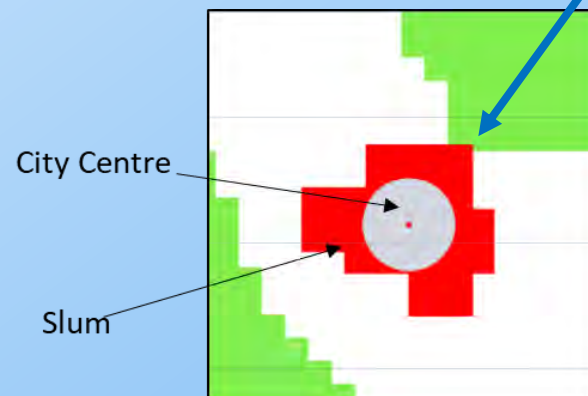

Production :
5-15 km from main roads.

Consumption:
Urban extent determined using road network data

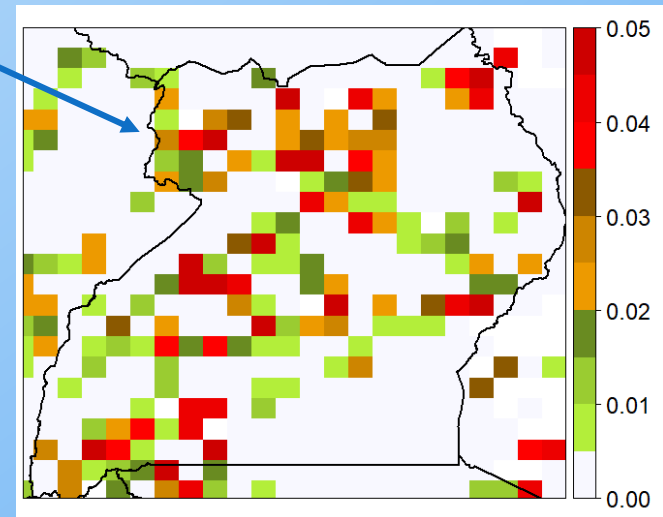

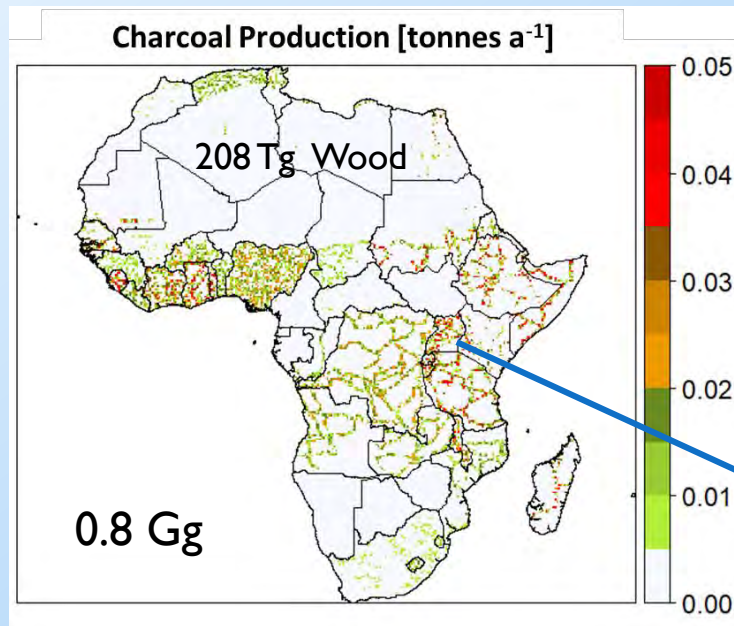

Plastic burning limited to slums.

Trucks:
Mapped around urban centres proportional to population

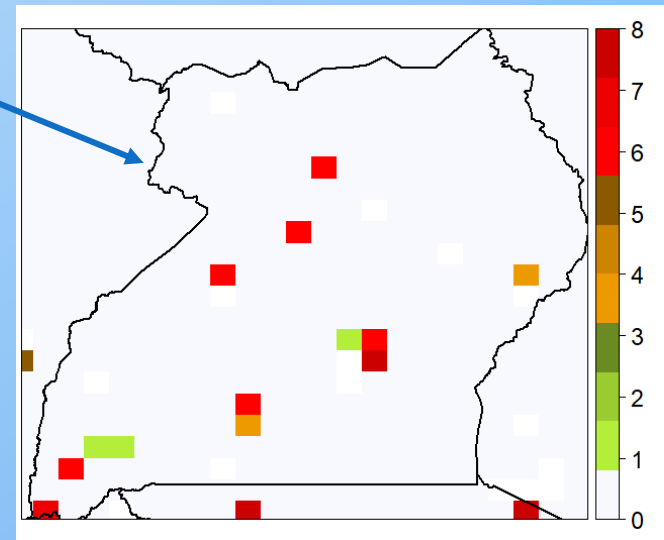

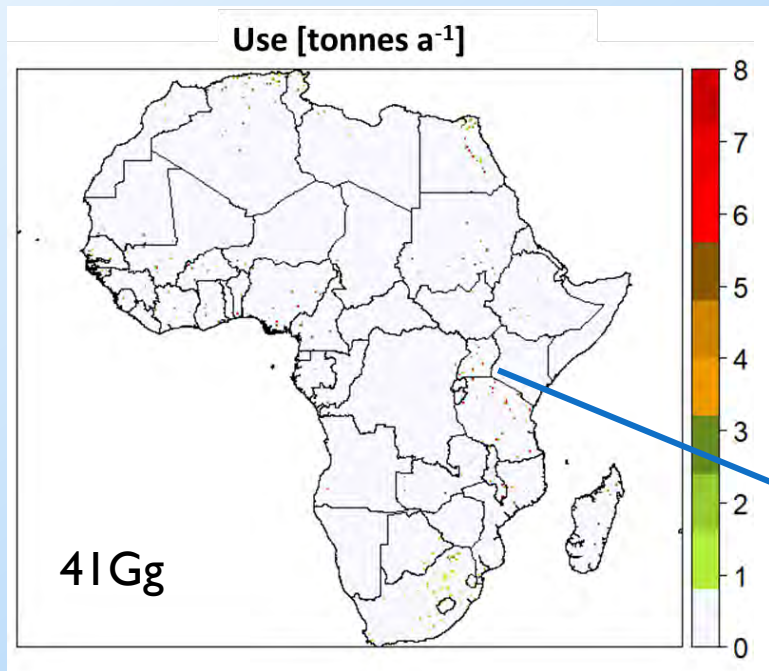

Spatial distribution of pollutants from the charcoal value chain in 2014

Emission of Black Carbon

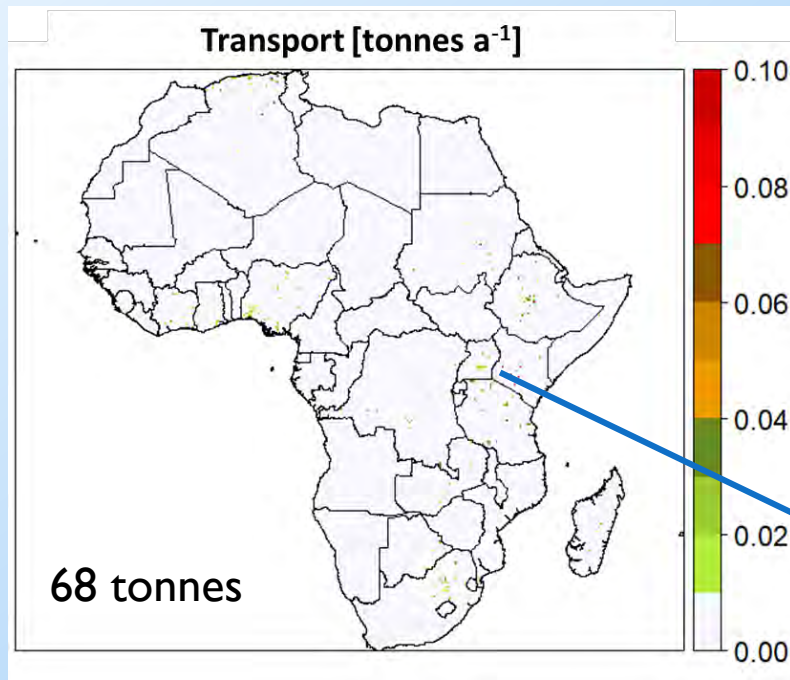

Spatial distribution of pollutants from the charcoal value chain in 2014

Emission of Black Carbon

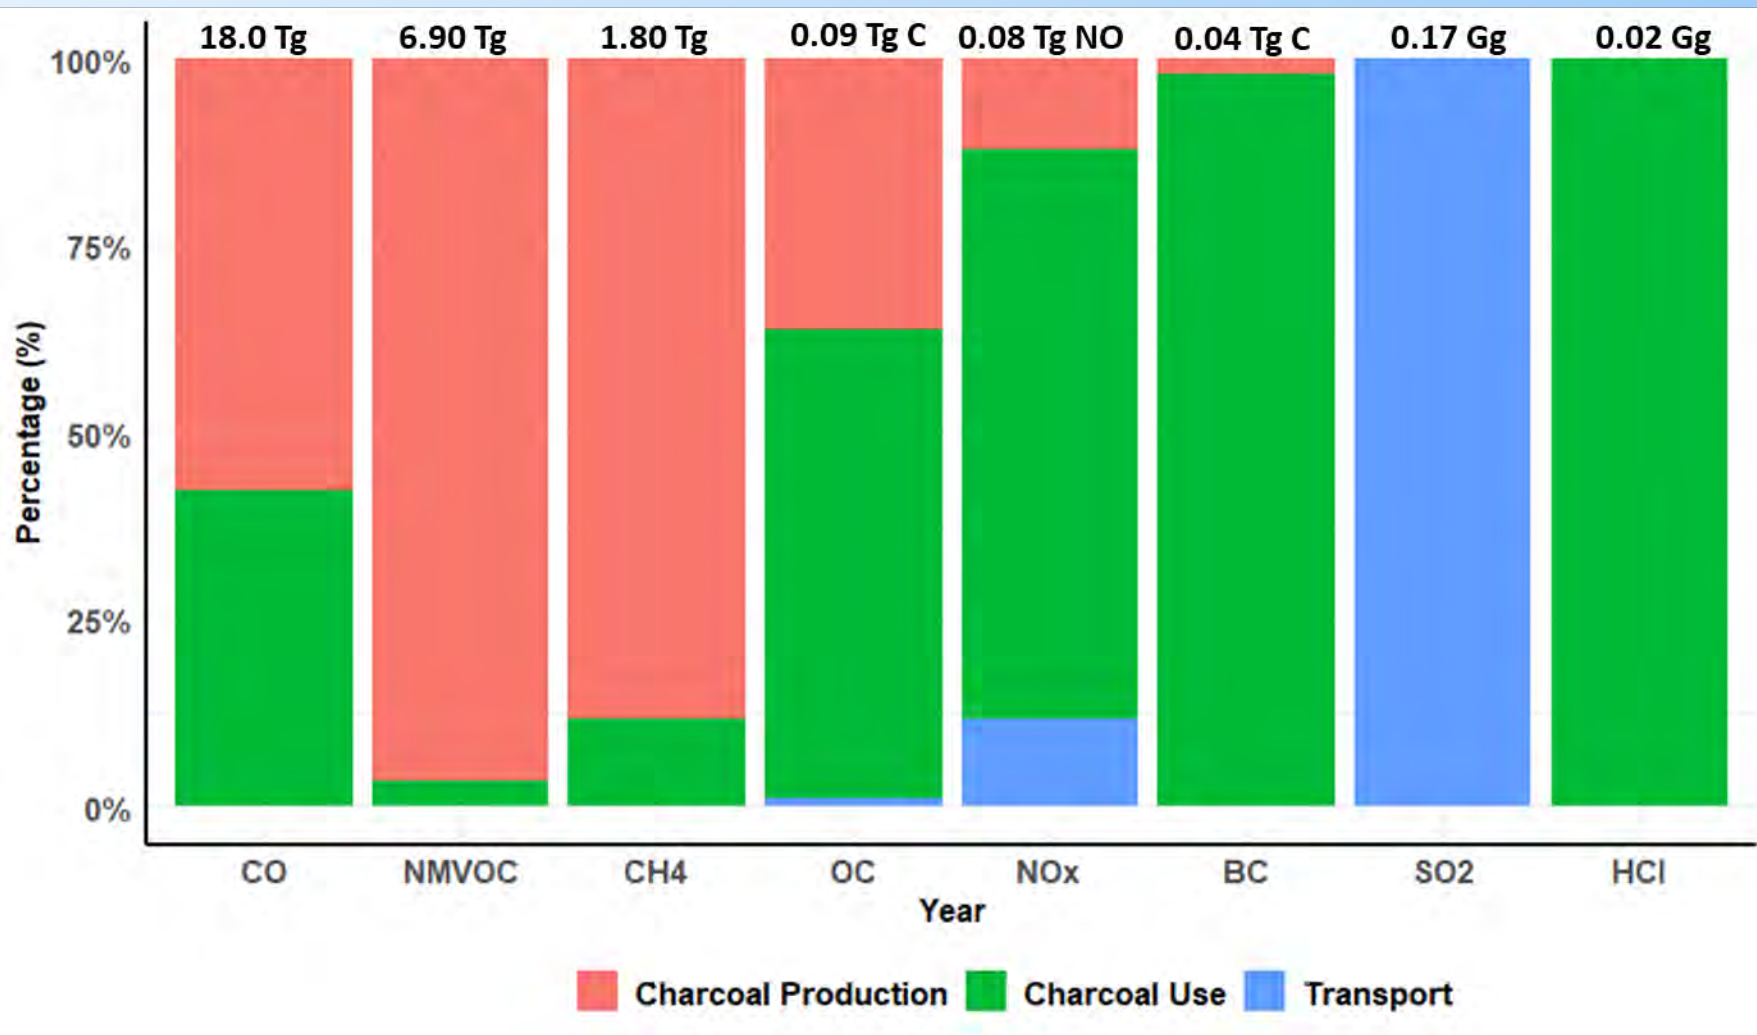

Spatial distribution of pollutants from the charcoal value chain in 2014

Emission of Black Carbon

Contribution of the charcoal activity to pollutant emission

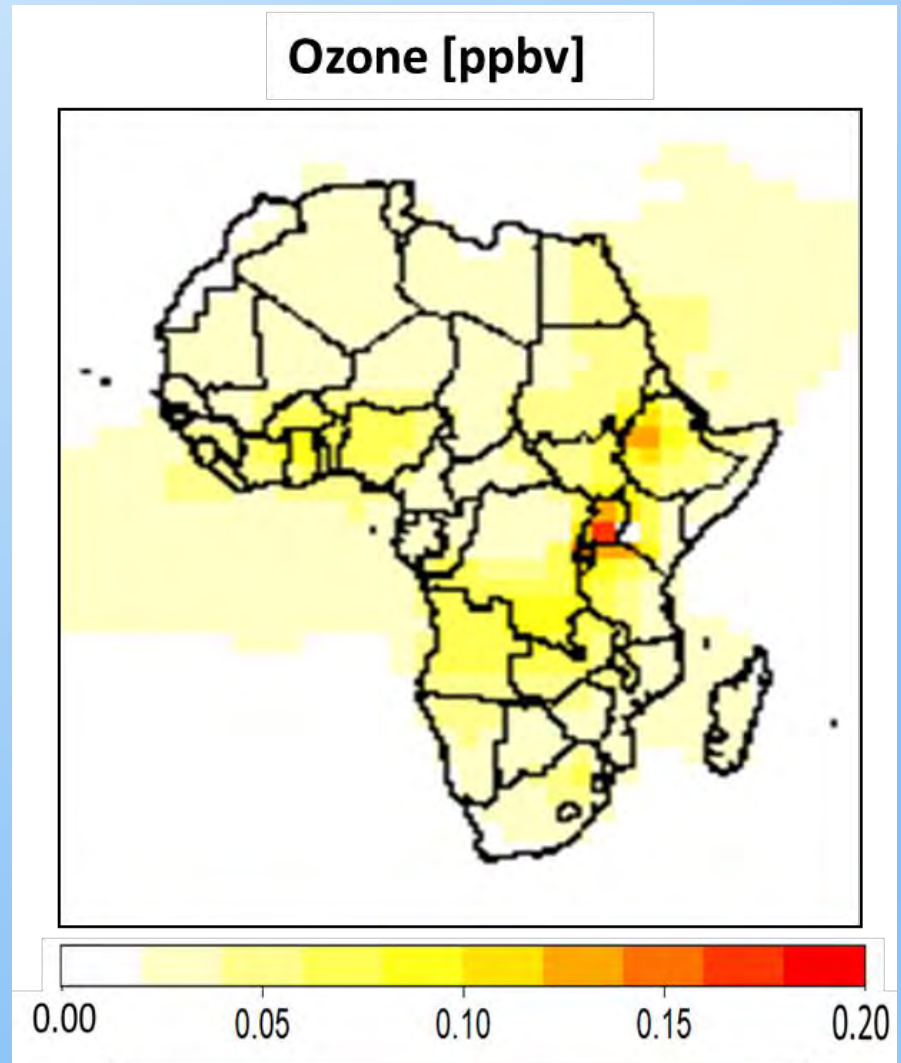

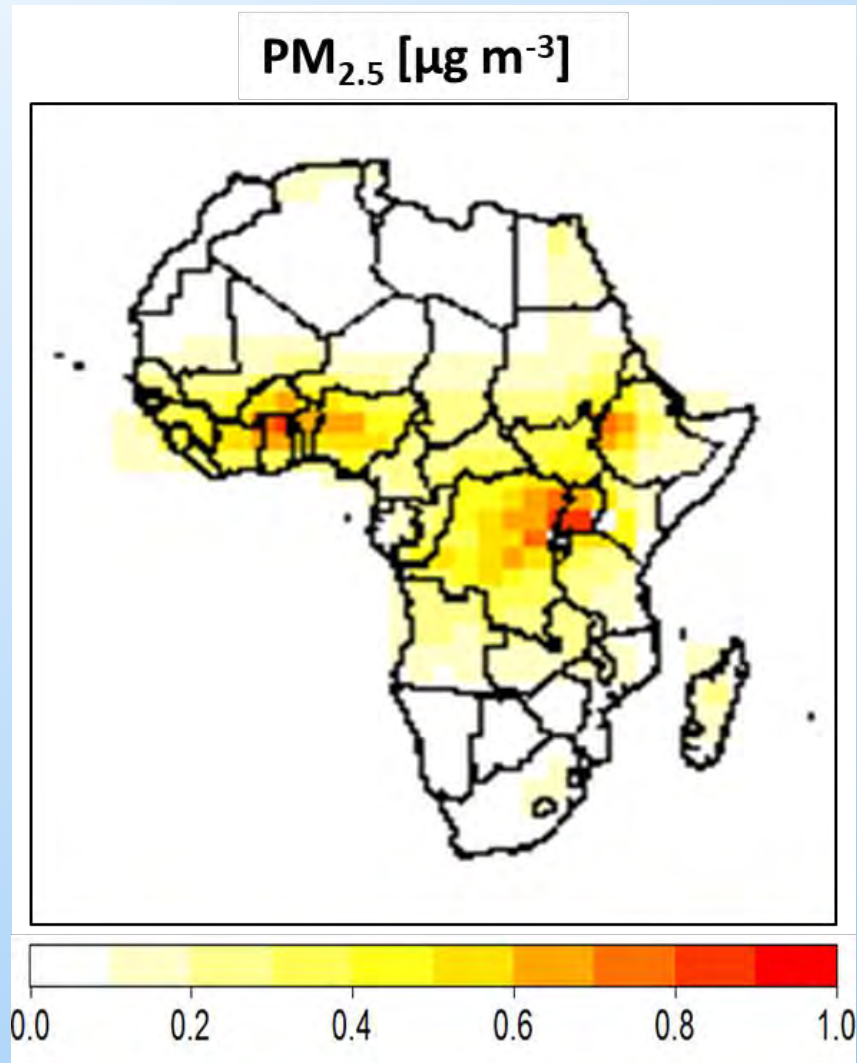

Chemical transport modelling

3D Chemical transport model driven by MERRA -2 meteorology

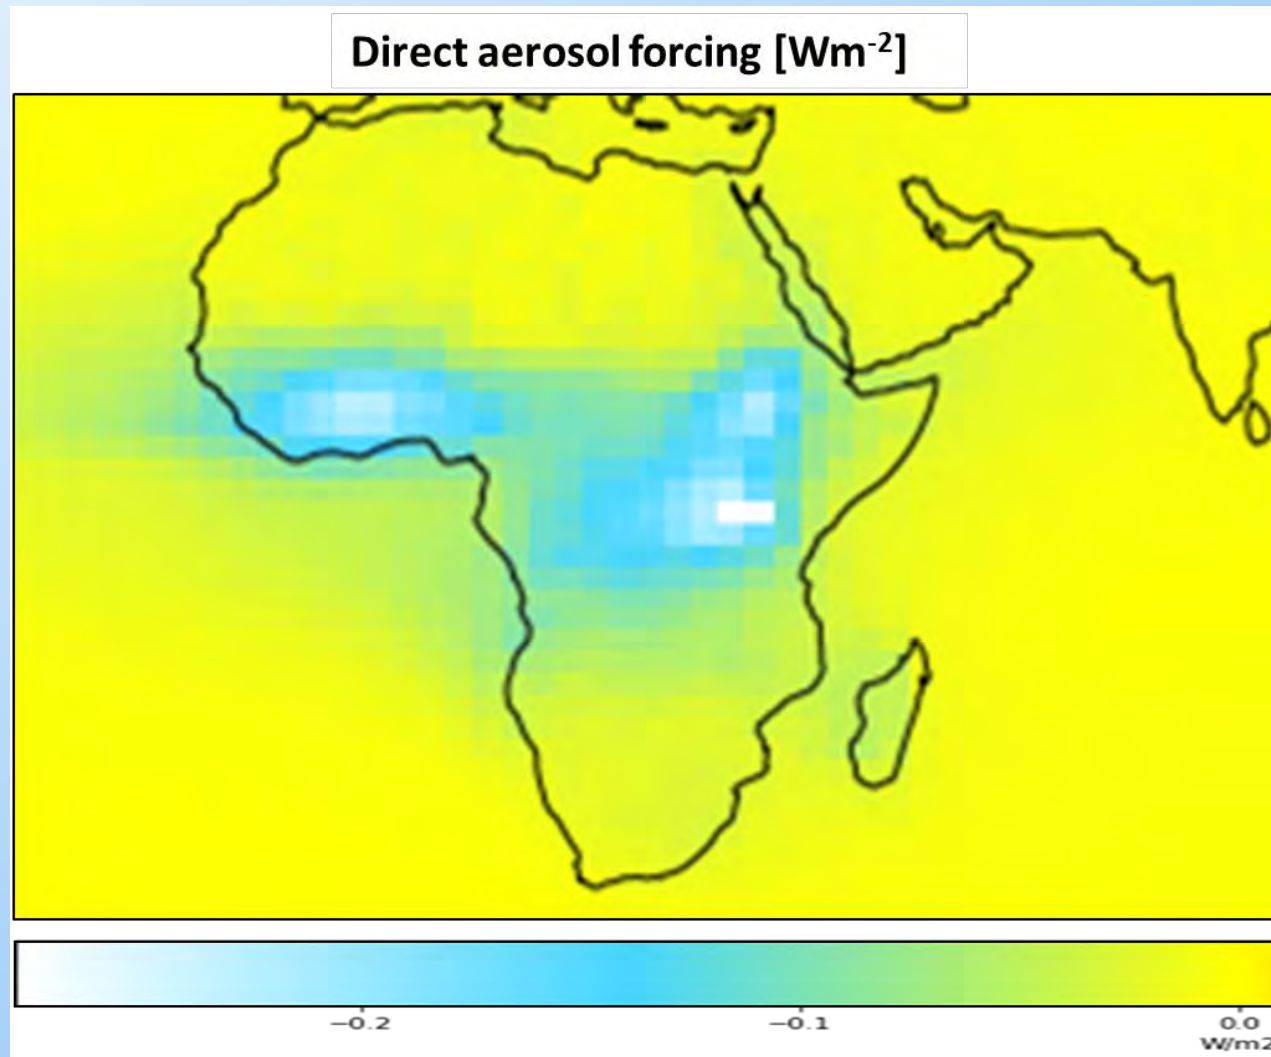

Grid Resolution: $2^0 \times 2.5^0$

Contribution of Charcoal to $\text{PM}_{2.5}$ and O_3 in 2014

$\text{PM}_{2.5}$ and O_3 concentrations from charcoal are highest in East and West Africa, with peak values of $1.2 \mu\text{g m}^{-3}$ and 0.2 ppbv respectively.

Radiative forcing of charcoal in 2014

Peak direct aerosol forcing from the charcoal emissions in Africa in 2014 is -0.2 Wm^{-2} .

*Thank
you*

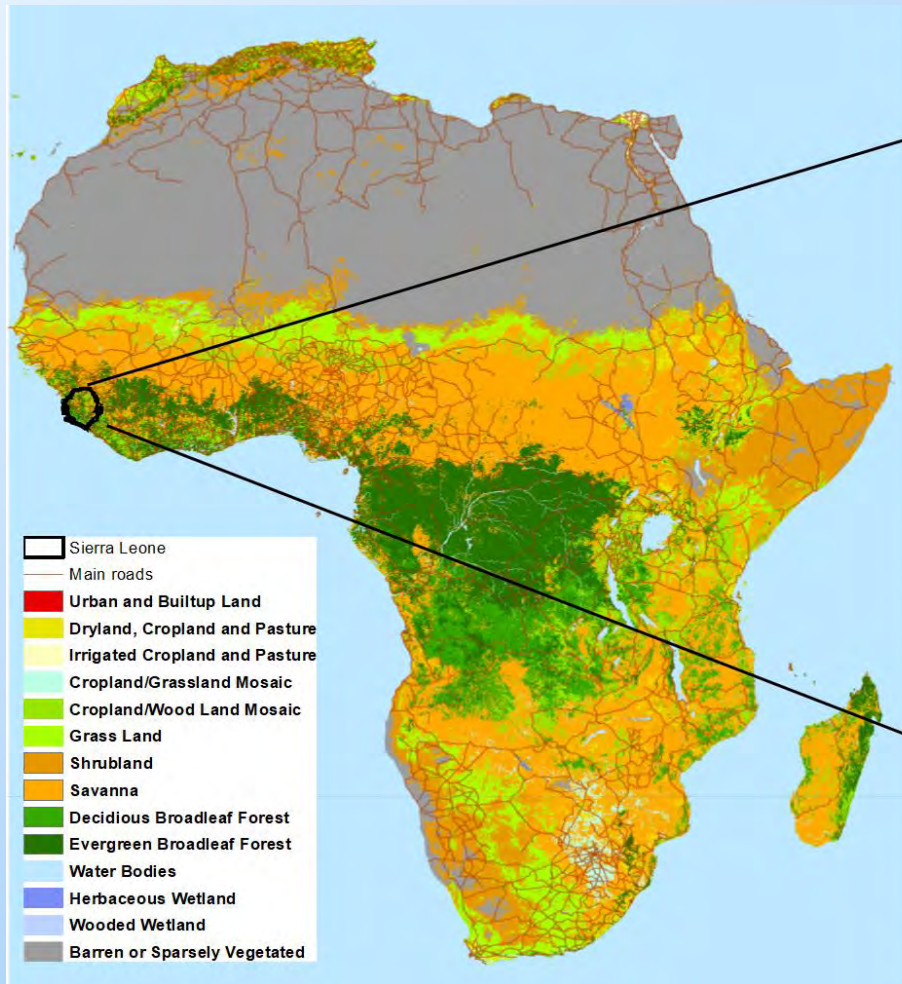

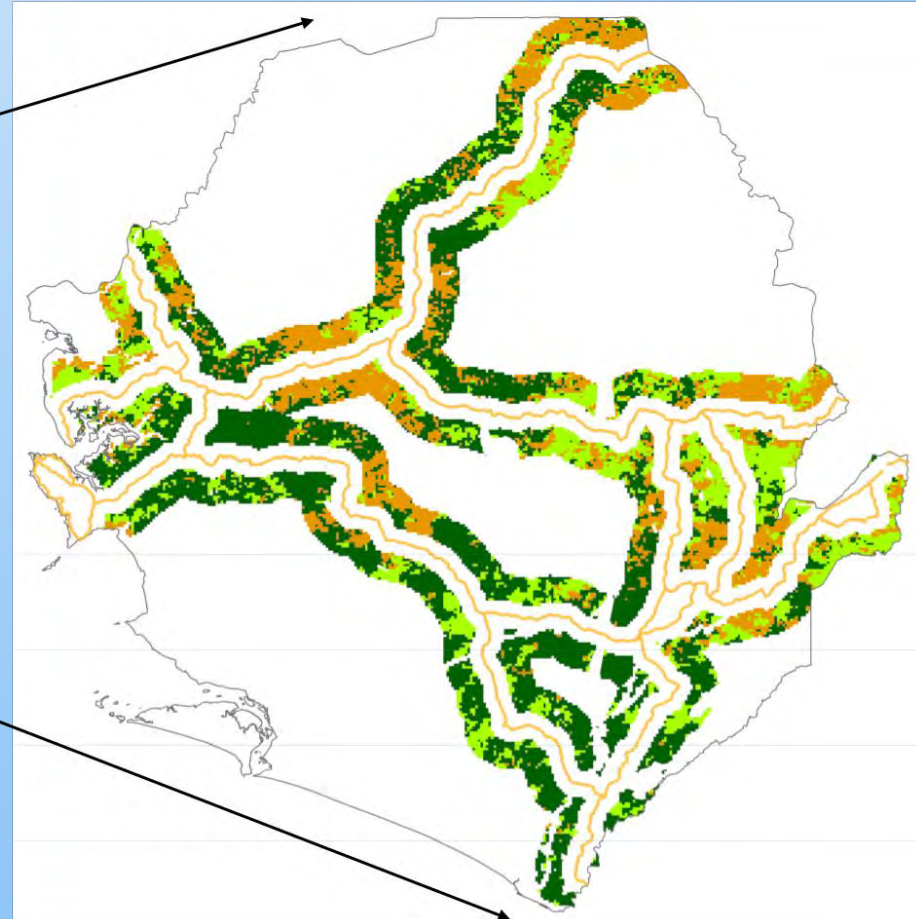

Mapping production zones

Land cover + main roads in Africa

Charcoal production location in Sierra Leone

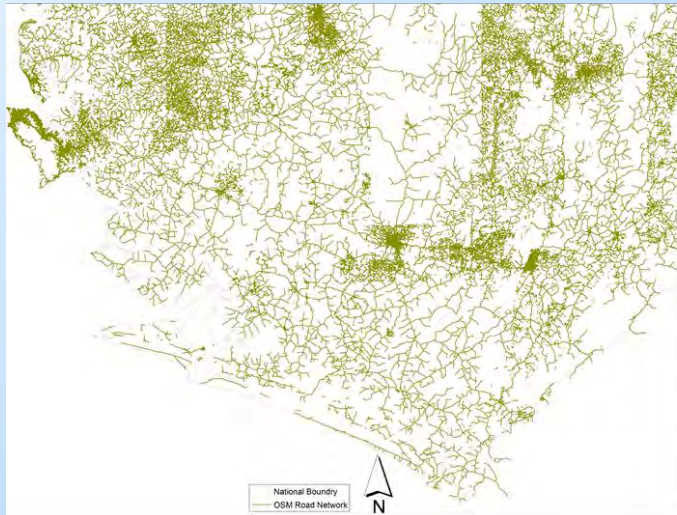

Production:

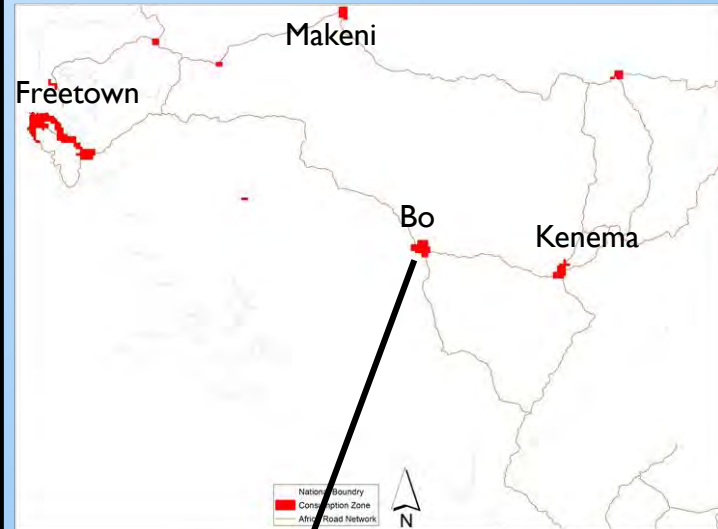

mapped 5 to 15 km from primary roads
(Campbell, 1996). We also account for vegetation
distribution and protected areas

Mapping consumption zones

OpenStreetMap Roads (Sierra Leone)

Consumption Locations = Cities

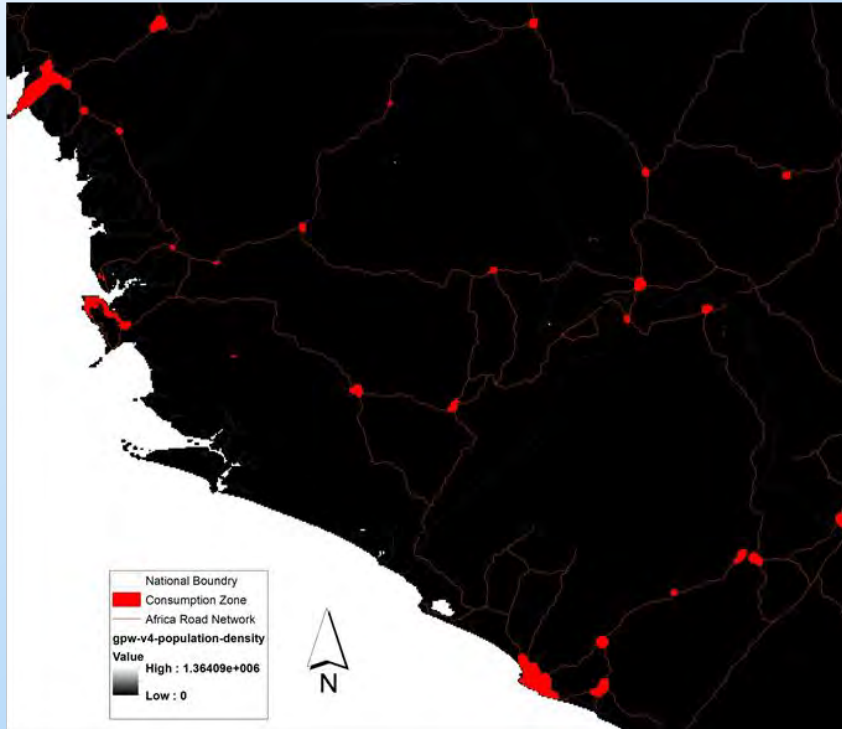

City Centre

Slum

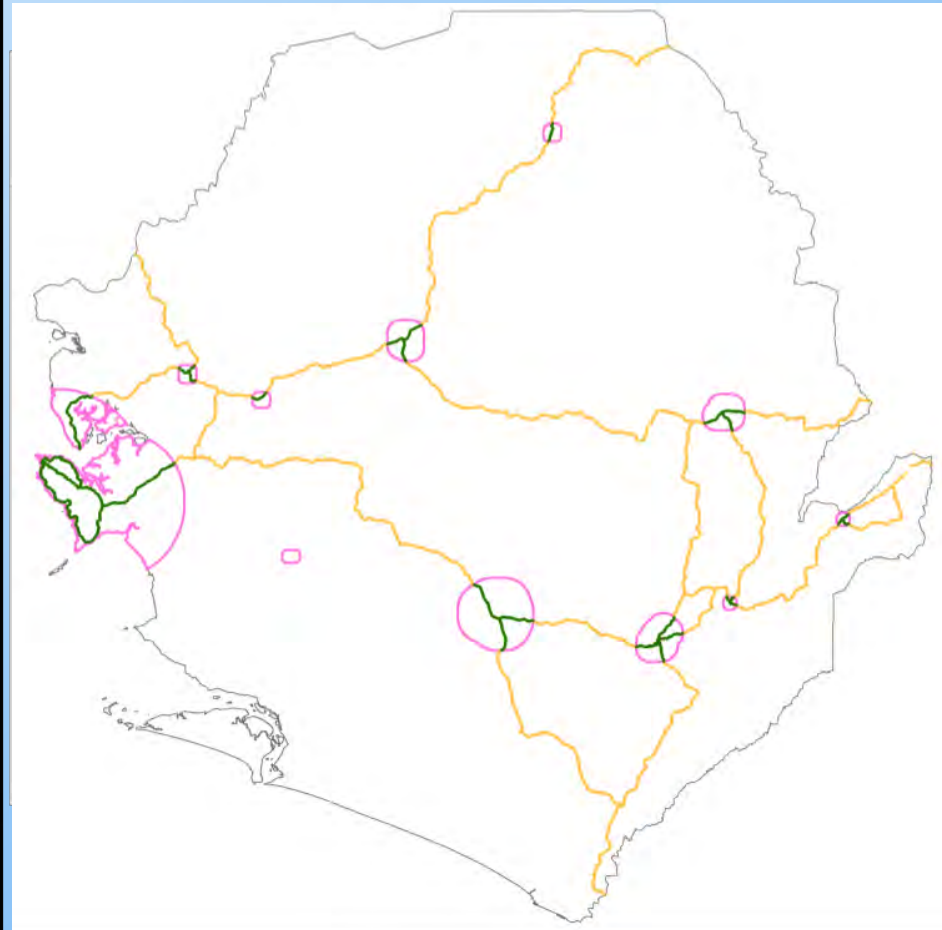

Mapping truck zones

OSM Roads + Population Density Grid

Truck zones and routes in Sierra Leone

Truck zone (purple), truck route (green), main roads (orange)

Developing emission inventory

Collecting activity data

Charcoal production (Tg) —→ United Nations energy statistics
Charcoal consumption (Tg) —→ United Nations energy statistics
Truck transport (Truck-km) —→ ???

Pollutants

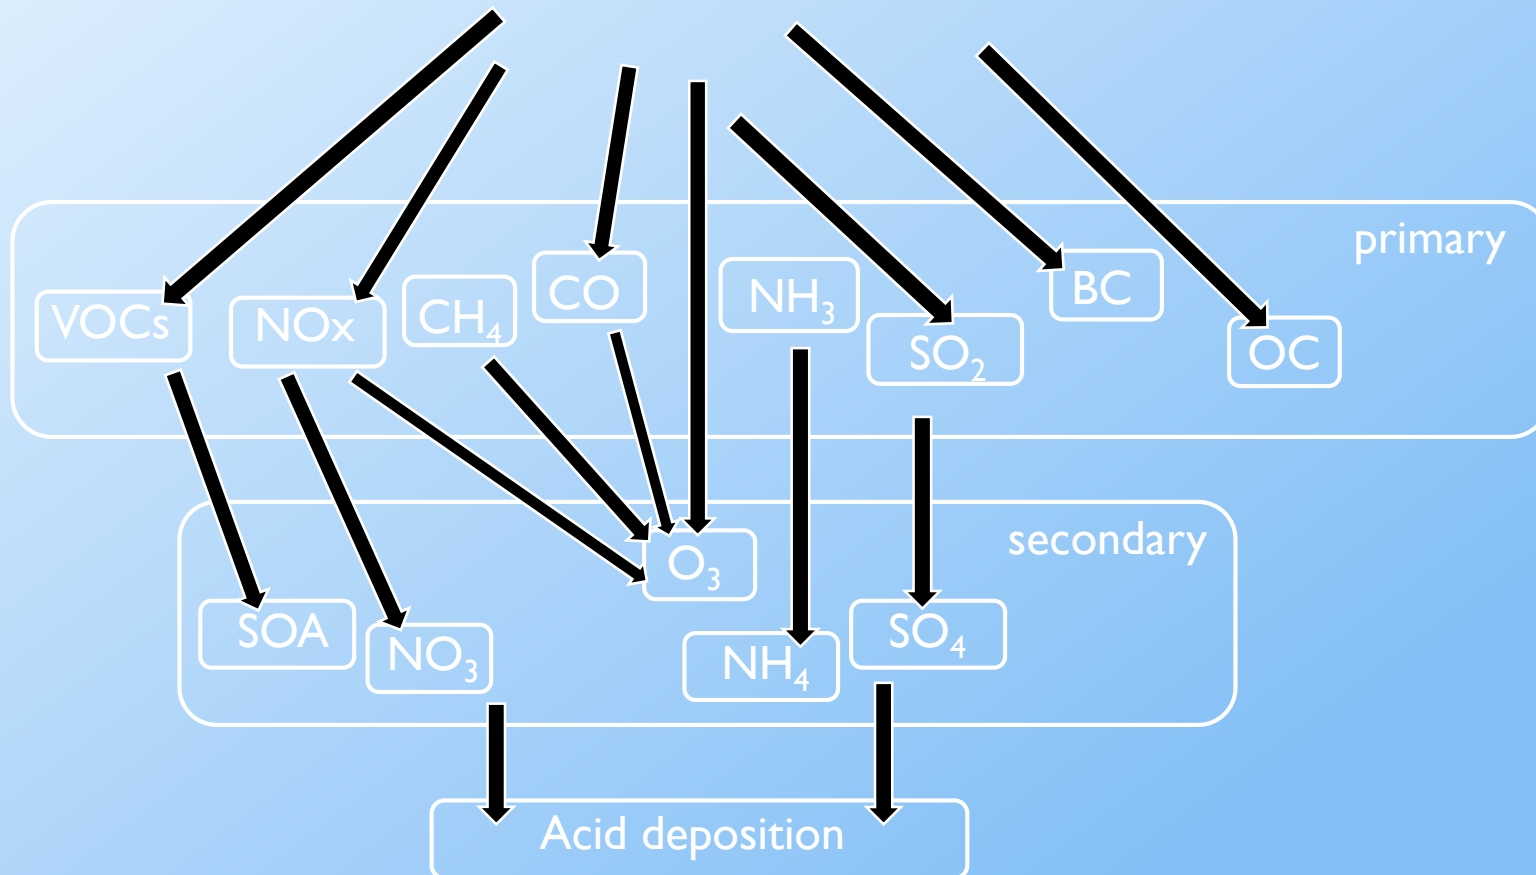

BC = black carbon
